CAUTION: This email originated from outside your organization. Please exercise caution when opening attachments or clicking links.

I'm clearly not that smart.

If I were that smart, I would probably use email notifications to trigger an automation that logged into the portal extracted any new files and then automatically produced and uploaded a response

Unfortunately I'm just not that smart. 😞

But if I were, that would only be a small part of a much larger stack

So to answer your question, I just read every OOR Final Determination and court opinion regarding the RTK law ever written, then spend weeks writing and rewriting my filings.

Right?! I saw the OOR's new language regarding the use of AI in appeal submissions.

That wasn't quite what I was asking, though. 😞 I was simply curious whether you have used RTK Corpus to research, develop, or prepare any of your RTKL requests, appeals, submissions, or related filings involving the Borough of Bath.
